## **NEW PRODUCT** Gas Stay Safety Locking Shroud

Gas stay safety shrouds positively lock when fully extended, protecting users from potential injury in the unlikely event of spring failure caused by misuse or overload

Simplicity itself, once the stay is fully extended, the shroud moves into place and automatically locks in position

Safe to use manual release (by applying thumb pressure in the designated area) which allows the gas spring to compress in a controlled manner

**UNLOCKED**

**LOCKED**

**ELIMINATES THE NEED FOR SEPARATE SAFETY RODS IN CRITICAL LIFT SITUATIONS**

**Part Number 818SS**
