## IMPORTANT PRODUCT ANNOUNCEMENT

Roof Hatch Modification affecting our smaller range .

Part Numbers 821475 and 821530

The “Stedall Roof Hatch” has long been recognised as the leading Hatch in the UK market. Earlier this year the decision was taken to upgrade various elements of the hatch to ensure that it remained in pole position. Stocks are on their way and the launch is imminent.

Investment in new tooling & machinery enables us to produce a high quality, unique grey aluminium frame and trim ring that provides maximum flexibility for varying roof thicknesses.

Specially designed moisture trap to ensure that there is no possibility of water penetration whilst the hatch is shut

New design of captive nut guarantees that the handles remain fixed to the frame throughout its life.

Expressly formulated wind deflector reduces noise and guarantees a perfect seal every time
