NEW TAILGATE OPENING MECHANISM

Working in conjunction with the manufacturers, Stedall is pleased to announce the introduction of an easy to fit Automatic Tailgate Opener / Closer that is ideal for use on wheelchair accessible vehicles. (Part number ATG1)

SAFETY IS PARAMOUNT

The mechanism has an electronic controller with a number of built in safety features.

Door operation is not limited in any way by the electrical system. If for some unknown reason the vehicle is without power, it is always possible to open and close the door manually by operating the handle in the normal manner. In powered mode, the door is designed to stop immediately if it encounters an obstruction.

The door can only be operated electrically when the vehicle is stationary

Technical Data

System voltage – 12VDC

Nominal current - 3A

Operating temperature range from -30°C to 80°C

Maximum vehicle permitted slope \pm 20 degrees

Duty cycle – 750,000 \pm 10,000 (open/close cycles)

Electrical motor – DC with gear assembly

Automatic and Manual control in both directions
